

TOYOTA LAUNCHES NEW OIL PACKAGING BAG-IN-BOX

Experience the Same Trusted Quality,
Now in New Innovative Packaging

We're excited to share that Toyota Motor Europe (TME) will become the first Vehicle manufacturer to introduce engine oil in Bag-in-Box (BIB) packaging. This move represents a significant step in our commitment to sustainability, without compromising the high quality you expect from Toyota Genuine Motor Oil (TGMO).

Practical and Environmental Benefits:

Toyota has set ambitious targets to reduce plastic use and CO₂ emissions, aligning with two of our key Environmental Challenges: Life Cycle CO₂ Reduction and Building a Recycling-Based Society.

The new Bag-in-Box packaging offers several practical and environmental benefits:

- Up to 3x Less Plastic
 - Cutting packaging CO₂ by 33%
- 4% More Efficient Pallet Loading
 - Reduced shipping emissions
- Built-In Tap – For clean, easy, and controlled dispensing
- Easy Recycling – Simply separate the box and pouch for hassle-free disposal

What's Changing?

The first oil grade moving to BIB packaging is: TGMO 5W30 FE – 5 Litres

New Part Number (BIB format):
08880-80845-BB

The current plastic bottle version (08880-80845) will be phased out and replaced by the new sustainable format.

**Be part of the shift.
Choose smart. Choose sustainable.**
